

Includes the features of BLS CPR SM101 and SM201

The Most Advanced BLS Training System

This is a high fidelity manikin with life-like interaction of chest movement and ventilations. Physical response is augmented by accurate digital feedback as you perform skills. It also includes the Quality Control Information (QCI) module for extensive control over data analysis.

Delta Tidal Flow Interaction System is ONLY found in SmartMan products. This technology provides accurate measurement, realistic physical feel and real time digital display of the movement of air in and out of the lungs during performance of CPR.

QCI Module

Gives you the ability to archive all results to the cloud. Results are then accessible for analysis anytime you want.

Filter data by date, activity, key code, or the number of attempts. Also you can exclude data, assign identifiers identify if feedback was available.

Export comma delimited data at any time.
