See The Meaning in Your Data

WORLD CLASS EXPERTISE

Created and Serviced by Experts who know and understand training data. From Experts who created the sensors and work with the data on a daily basis. Get the benefit of their years of knowledge and know how. rather than employ new people to learn and work on the data. eSERT Removes the Hassle and additional Costs, so that all you need is to examine the graphs, reports, tables, and see the trends.

PREPARES THE DATA

eSERT Console

Data Assembly

- Collect Data from multiple sites
- Clean Data so you only look at what is relevant
- Identifies and Corrects Name Variations
- Verifies all results are available

Administrative Control

- Add Users whenever you want
- Modify Personal and Professional Details
- Manage Employee Changes such as Transfers and Add new employees
- Make Users Active / Inactive

The eSERT Console does the hard work for you. It collects all of the data from different sites. It also cleans the data and verifies that it is not corrupted.

eSERT Console provides the tools to overcome human errors such as mistakes in names, variations in names at different sites.

The administrator has stand-alone software to manage results data from anywhere. It has encrypted password protection and provides the ability to add and modify participants information and details whenever they wish.
