

SmartMan was back for another year at Arab Health, our 5th year at this huge show.

SmartMan continues to captivate people with its advanced technology as more and more people from this part of the world appreciate our higher accuracy and real-time feedback.

SmartMan - Built on the Science with Accurate Feedback

The unique features of SmartMan relate to better clinical outcomes and more survivors.

Our high fidelity full body simulators contain proprietary accurate sensors. Participants receive the data performance analysis of their performance on the spot. This was the first year for us to introduce a hands-on session for mock codes in this part of the world.

High Fidelity Feedback Simulation
