

Arab Health is one of the largest healthcare exhibitions in the world and people from all over came to spend some quality time on SmartMan. For the 4th year in a row, Smartman was welcomed back at Arab Health 2019 in Dubai, UAE.

Durable Medical Simulator for Practicing Procedural Skills

Our full body manikin simulators were a hit with crowds of people waiting to get their chance for Hands-on. The excitement and natural competition when they saw the instant feedback made for lively practice sessions.

For specific sessions others came back run through code blue / rapid response procedures. SmartMan Baby is always popular with its “amazingly sensitive airway feedback”.
