

The U.S. Department of Commerce invited SmartMan to showcase in Shanghai at the China International Medical Equipment Fair 2019. As participants experienced SmartMan's latest resuscitation training simulation line, they were impressed with our knowledge of teaching, training, and retaining people in the system. It demonstrated how simple it is to integrate into SmartMan into their training programs. With programs at an affordable price, people were ecstatic by how SmartMan's instant feedback system helped improve their skills and timing.

### MegaCode Team Training Procedural Skills

SmartMan Simulators are built to last. They have Advanced Responsive Simulations but also serve as Accurate Task Trainers for repeated hard use. These systems are easy, cost effective and proven to lead to high levels of competence, and improved survival outcomes.
