

SmartMan in Dubai, February 2017

The SmartMan team had a great reception at Arab Health which was held in Dubai UAE.

It was a huge exhibition with people from many different parts of the world seeing how SmartMan brings more life-like training to CPR than any other system. It is a central commute for people from Europe and from India and Pakistan.

The SmartMan Booth

Young and old, professionals and lay persons all got down to feel and see the latest advances in SmartMan CPR training.

As always, people found our color bars easy to understand even if they have very little English. And the SmartMan accuracy remains a leader in CPR training.

We ran through scenarios and made general presentations to large groups of people. Many people want to run through several times. It feels good and they want to get a high score.

“It is incredible that you can feel and see it as you do it. Great. Congratulations!”

“I’ve never felt that interaction before.”

“You can really feel the quality of the manikin. It is so much more realistic than others”

“It is a wonderful product.”
