

## SmartMan in Magdeburger, Germany, March 2017

High quality CPR with advanced simulation features.

SmartMan brings world's best practice at a reasonable price to CPR Training.

### Simulations Integrated with Advanced Physical Response

Magdeburger Notfallkongress had a wide variety of emergency simulations as well as emergency devices. SmartMan was even on an ambulance for scenario training.

SmartMan brings advanced simulations that relate skills performance with the condition of the patient. Students see what effect they are having on the patient. This is both a great incentive to perform well and it provides deep understanding as to why their performance quality matters.

### Show Casing SmartMan Special Features

SmartMan had a booth at the show. We were able to showcase to people who were interested in exploring the special features of SmartMan products for emergency simulation.

Thank you to everyone who stopped by the booth and spent time with us.
