

SmartMan in Prague, October 2015

The SmartMan team attended the European Resuscitation Congress for discussion on the release of the ILCOR Guidelines 2015.

Besides meeting people from Europe they participated in the science discussions.

The SmartMan Room

The SmartMan Room was a great success. We were demonstrating the Full Body Megacode, ALS Airway (both normal and low volume), Infant – Baby and Infant – Neonate Products.

It was a great chance to introduce the high quality of SmartMan to people from central Europe. People from Lithuania, Latvia, Czech Republic, Poland, Hungary, Romania, and most western European countries stopped by to have some direct skills time on SmartMan.
